

Thoracic Surgeon

Providence Swedish Cancer Institute

Position Description

Providence Swedish Cancer Institute (PSCI) is seeking a full-time, board-certified/board-eligible Thoracic Surgeon to join its nationally recognized thoracic surgery program working in Everett, Washington.

This is an outstanding opportunity to become part of one of the Pacific Northwest's premier multidisciplinary programs. The successful candidate would work alongside an growing team of medical oncologists, radiation oncologists and interventional pulmonologists along with an established gastroenterologists, radiologists, pathologists, and advanced practice clinicians dedicated to delivering exceptional, patient-centered care.

The successful candidate will provide comprehensive surgical care for patients with benign and malignant diseases including lung cancer, esophageal cancer, mediastinal tumors, chest wall tumors, benign foregut diseases (hiatal hernias, GERD and achalasia) and other complex thoracic diseases. The position offers access to advanced minimally invasive and robotic-assisted surgical technologies, a robust clinical trials infrastructure, and the opportunity to participate in program development, quality initiatives, education, and research across the Providence - Swedish Cancer Institute network at its Everett campus

Position Highlights

- * Full-time position
- * Practice located at the Everett Campus in Everett
- * Established referral base across the Providence - Swedish Cancer Institute and Digestive Health Institute
- * Access to advanced robotic and minimally invasive thoracic surgical technology
- * Opportunity to participate in clinical research and clinical trial development
- * Dedicated APP, nursing, and administrative support

- * Leadership and program-building opportunities available for qualified candidates
- * Work alongside nationally recognized thoracic surgery and oncology specialists
- * Compensation is between \$610,866 and \$762,516 per year

Position Responsibilities

- * Provide comprehensive surgical evaluation and management for patients with thoracic diseases
- * Perform minimally invasive, robotic-assisted, and open thoracic surgical procedures
- * Participate in multidisciplinary tumor boards and complex GI planning conferences
- * Collaborate closely with medical oncology, radiation oncology, pulmonary medicine, gastroenterology, pathology, and radiology colleagues
- * Support quality improvement initiatives and evidence-based clinical pathways developed within the Division of Thoracic Surgery
- * Participate in teaching and mentorship of trainees, advanced practice clinicians, medical students and other healthcare professionals as appropriate
- * Contribute to clinical research and programmatic growth within the Providence - Swedish Cancer and Digestive Health Institutes
- * Deliver compassionate, patient-centered care consistent with Providence - Swedish's mission and values

Required Qualifications
